Subject: Microsoft Settlement

The Department of Justice is not acting in the best interest of this country to pursue an antitrust accusation against the Microsoft Corporation. Microsoft is not a monopoly. They are an independent competitive corporation that has provided innovative and beneficial products and services to the businesses and consumers of American and the world.

Why does the DOJ think profit means corruption? Microsoft is simply our American system of business working in its finest form.

For the DOJ to listed to a handful of Microsoft competitors and their claim that they have been restricted from operation in a free marketplace is just irresponsible. We have a free marketplace and it is the responsibility of the DOJ to keep it that way, by allowing Microsoft, and other corporations like it to continue operating and exploring and creating new and exciting products and services, without interference or restriction from the Department of Justice.

Keep America Free! Keep our way of life and our way of American commerce unencumbered by useless and destructive litigation. Don't let the whining complaints of the few hurt the productivity and opportunity of the many.
